

VISION SCREENINGS

According to NY State guidelines, students in grades K, 1, 2, 3, 5, 7 and 10 are required to have visual acuity screenings. Screenings will be ongoing throughout the 2010 – 2011 school year. Should you choose to have your child screened by his/her private eye care specialist, please send a letter to school indicating your wishes along with a signed copy of the exam results from your child's physician.

If any concerns are noted during the screening at school, parents will be notified so that follow up appointments can be scheduled with the appropriate medical professionals.
